

# TruBILL

Institutional U.S. Treasury yield on Solana, with permissioned access, T+0 redemptions and onchain utility.

BACKED BY [ULTRA Fund](#) · [FundBridge Capital](#), fund manager · [Wellington Management](#), sub-manager · [Libeara](#)

## Built for

### TradFi & family offices

Permissioned access to Treasury yield, without direct DeFi exposure.

### Operational treasury

Yield on operational float with T+0 redemption for settlement flows.

### Market makers

Yield on idle stablecoin inventory with fast liquidity access.

## Key features

### T+0 redemptions

Instant USDC redemptions via onchain buffer and liquidity partners.

### Treasury yield

Backed by the ULTRA Fund. Yield accrues daily via NAV.

### Permissioned

KYC and KYB at issuance and redemption.

### Onchain utility

Use across supported Solana venues.

### Reporting ready

Live Proof of Reserves and reporting dashboard.

### Secure

Bankruptcy-remote BVI SPV. Audited smart contracts.

## How it works

01

### Onboard

KYC and KYB onboarding.

02

### Deposit USDC

Via supported workflow.

03

### Issue TruBILL

Treasury receipt issued.

04

### Use onchain

Across Solana venues.

05

### Redeem

T+0 onchain redemptions
